Uploaded Job Description (Summary)

Title: Registered Nurse – Primary Care. Location: Stockholm, Sweden. Employment: Full-time (day shifts, occasional Saturdays).

Tasks: conduct triage assessments, vital sign checks, wound management; administer medications and vaccinations; follow up chronic disease (diabetes, hypertension); coordinate care with general practitioners, physiotherapists and dietitians; update patient charts and ensure hygiene and documentation compliance; participate in internal quality improvement and patient-safety reporting. Qualifications: Registered Nurse license (Sweden), minimum 2 years in primary/community care, familiarity with EHR systems (TakeCare or Cosmic), BLS certified, fluent in Swedish and English.

AI-Powered Cover Letter Generation

Anna Bergström, RN | anna.bergstrom@example.com | +46 73 555 00 44 | Stockholm, Sweden

- Dear Hiring Team at NordicCare Center,
- I am writing to express my interest in the Registered Nurse – Primary Care position in Stockholm. I am a Registered Nurse licensed in Sweden with five years' experience in

primary care, community health and acute medical wards. My current role at Nordic Family Clinic has me performing triage, wound care, vaccinations, chronic disease follow-up and EHR documentation in TakeCare daily. I have also previously managed hypertension and diabetes programs and logged care in Cosmic.

- I hold current BLS certification and infection-control training. I have delivered large vaccination campaigns (2,000+ vaccines in 2022), developed a patient education checklist that improved documentation completeness by 20%, and mentor nursing students while providing BLS refreshers for staff. I routinely collaborate with physiotherapists and dietitians, coordinate referrals and follow-ups, and participate in infection-control and quality-improvement activities.
- I am fluent in Swedish and English, comfortable with TakeCare and Cosmic EHRs, and able to maintain high standards for documentation and hygiene compliance. I am enthusiastic about NordicCare's patient-centered, multidisciplinary approach and would welcome the opportunity to contribute to continuity of care for families in central Stockholm.
- Thank you for considering my application. I look forward to the possibility of discussing how my experience in triage, vaccination campaigns, chronic disease management and quality improvement can support your team.
- Sincerely,
- Anna Bergström, RN

CV Analysis with Improvement Tips

- Use consistent date formatting and role headings (e.g., Employer | Location | YYYY-YYYY) — already mostly present; mirror this consistently in both rewritten CVs.
- Make responsibilities parallel and action-oriented, each starting with a strong verb (Provide, Administered, Documented, Developed, Mentor). Maintain that in both versions.
- In Experience bullets, split combined ideas into separate bullets when they include multiple facts (e.g., "Mentor 2 nursing students per semester; deliver BLS refreshers to staff" → two bullets). Apply this split in both rewritten CVs.
- Standardize system and certification entries under a singular Skills/Certifications section (TakeCare, Cosmic, BLS, Infection Control Training). Keep exact spellings and acronyms.

- Emphasize measurable outcomes already present (2,000+ vaccinations, 20% documentation improvement, 15% adherence improvement). Keep these numbers intact and visible near the top of the role descriptions.
- Reflect the improvements suggested (parallel verbs, split combined bullets, consistent headings) identically in the Human/Full and ATS-Optimized CV outputs below.

Skill Match Evaluation (with Scores Table)

Skill	JD Demand	Candidate Level	Match%	Notes
Registered Nurse license (Sweden)	Required	Registered Nurse (Leg. Sjuksköterska) – Sweden	100%	License explicitly listed.
Minimum 2 years primary/community care	Required	5 years' experience in Swedish primary care and community health; roles 2019–Present	100%	Clear multi-year primary/community care experience.
Familiarity with EHR (TakeCare or Cosmic)	Required	TakeCare; Cosmic	100%	Both TakeCare and Cosmic explicitly named.
BLS certified	Required	BLS (2025)	100%	BLS certification present.
Fluency in Swedish	Required	Swedish (Native)	100%	Native Swedish stated.

Skill	JD Demand	Candidate Level	Match%	Notes
Fluency in English	Required	English (Fluent)	100%	English fluency stated.
Triage assessments	Required	Provide triage and care for ~25 patients/day	100%	Triage explicitly stated in current role.
Vital sign checks	Required	Not Mentioned	0%	Vital sign checks are not explicitly listed in the CV.
Wound management	Required	Wound care; home visits for wound management	100%	Explicit wound care responsibilities in multiple roles.
Administer medications	Required	IV therapy; medication administration (hospital); vaccinations	100%	Medication administration and IV therapy documented.
Vaccinations	Required	Administered flu/COVID-19 vaccines to 2,000+ patients (2022 campaign)	100%	Large vaccination campaign explicitly recorded.

Skill	JD Demand	Candidate Level	Match%	Notes
Chronic disease follow-up — Diabetes	Required	Managed diabetes patient programs; chronic follow-up at Nordic Family Clinic	100%	Diabetes follow-up explicitly noted.
Chronic disease follow-up — Hypertension	Required	Managed hypertension patient programs; chronic follow-up	100%	Hypertension follow-up explicitly noted.
Coordinate care with general practitioners	Required	Not Mentioned	0%	CV lists coordination/referrals and multidisciplinary work, but does not explicitly name general practitioners.
Coordinate care with physiotherapists	Required	Collaborated with physiotherapists in multidisciplinary teams	100%	Explicit collaboration noted.

Skill	JD Demand	Candidate Level	Match%	Notes
Coordinate care with dietitians	Required	Collaborated with dietitians in multidisciplinary teams	100%	Explicit collaboration noted.
Update patient charts (EHR)	Required	Document and update care plans in TakeCare; logged treatments and notes in Cosmic	100%	Frequent EHR documentation in both TakeCare and Cosmic.
Ensure hygiene compliance	Required	Participated in infection control team and hand-hygiene audit program	100%	Infection control and hand-hygiene audit experience present.
Documentation standards	Required	Developed patient education checklist improving documentation completeness by 20%	100%	Clear work on improving documentation standards.

Skill	JD Demand	Candidate Level	Match%	Notes
Participate in quality improvement projects	Required	Developed checklist; participated in infection-control audit	100%	Quality-improvement involvement documented.
Patient-safety reporting	Required	Not Mentioned	0%	Patient-safety reporting is not explicitly stated in the CV.

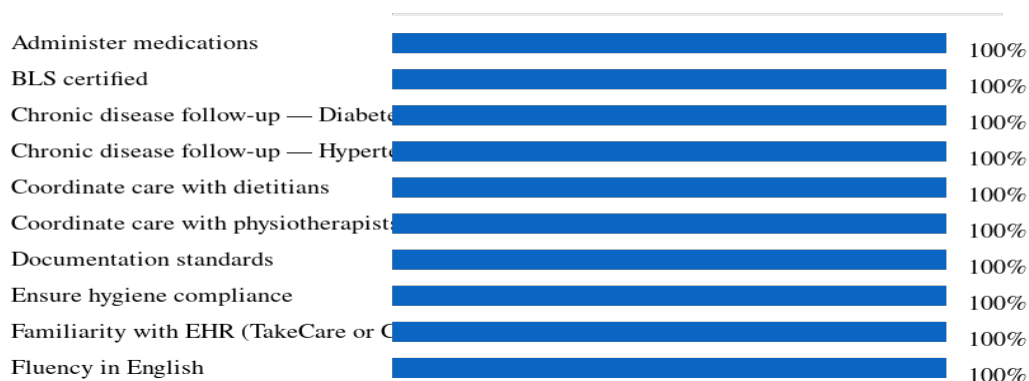

Coverage 86% / 0% / 14% (18 matched • 0 partial • 3 not mentioned)

Matched ≥80%, partial 1–79%, not mentioned 0% — based on the skills table above.

Interview Question Generator

1. Describe your daily triage workflow when you see approximately 25 patients per day. How do you prioritise care?
2. Tell us about the 2022 vaccination campaign you supported. What was your role and how did you manage logistics, documentation and patient flow?

3. *Give a specific example of a wound-management case you handled during a home visit. What assessment, treatment and follow-up did you provide?*
4. *Explain how you use TakeCare and Cosmic in your documentation. How do you ensure accuracy and continuity across systems?*
5. *Describe the patient education checklist you developed. What prompted the change, how was it implemented, and what measurable results did you track?*
6. *How have you collaborated with physiotherapists and dietitians to manage a patient with complex chronic conditions?*
7. *Discuss your infection-control work and participation in hand-hygiene audits. What improvements resulted from these activities?*
8. *How do you coach or mentor nursing students and staff on BLS and clinical practice? Provide an example of a teaching moment and its outcome.*
9. *Describe a situation where you identified a safety or documentation gap. What steps did you take and what was the outcome?*
10. *How do you balance administrative tasks (EHR updates, referrals) with direct patient care during a busy clinic day?*

Salary Guidance & Negotiation Tips

- Typical salary range for a Registered Nurse in primary care in central Stockholm (2025 market): approximately SEK 32,000–42,000 monthly gross depending on experience and municipal/private provider differences. Private clinics in central Stockholm sometimes offer slightly higher base pay plus schedule-related supplements.
- Given Anna's 5 years of experience, documented outcomes (2,000+ vaccines, 20% improvement in documentation, 15% adherence improvement), and mentoring responsibilities, target the mid-to-upper part of the range: SEK 36,000–42,000 per month.
- Negotiation tips:
 - Lead with documented achievements (vaccination campaign numbers, documentation improvement percentages, program adherence improvements).
 - Request clarity on working hours, weekend/saturday expectations, and any shift differentials or overtime policies.
 - Ask about professional development support (courses, conferences), BLS refresher reimbursement, and time for mentorship responsibilities.

- If offered below target, propose a review at 6 months tied to specific KPIs (patient satisfaction, documentation completeness, vaccination throughput).

Company-Specific Clothing Advice

- For clinical shifts: wear clean professional clinical attire (scrubs or clinic-provided uniform) and comfortable supportive footwear; follow infection-control policies on jewelry and nail length.
- For interviews or first meetings with management: smart business-casual (neat blouse or shirt, tailored trousers or skirt) is appropriate. Bring a clean coat/blazer for outdoor travel.
- Nordic cultural note: modest, tidy and professional appearance is valued; avoid overly formal business suits for clinical interviews but ensure a neat, approachable look.

Company Background and Future

- NordicCare Center is described as a private primary care provider serving families in central Stockholm, focused on patient-centered care, continuity and a multidisciplinary team approach while using a modern electronic record system.
- Future directions likely relevant to this role include continued emphasis on EHR-driven continuity of care, multidisciplinary coordination (physiotherapists, dietitians, GPs), quality-improvement initiatives, preventive care (vaccinations, chronic disease management) and patient-safety processes. Candidates with practical EHR experience and proven quality-improvement contributions align well with these priorities.

Rewritten CV — Human/Full

Anna Bergström, RN | anna.bergstrom@example.com | +46 73 555 00 44 | Stockholm, Sweden

Professional Summary

- Dedicated Registered Nurse with 5 years' experience in Swedish primary care, community health and acute medical wards. Skilled in triage, patient education, wound care, vaccinations, IV therapy and chronic disease management. Strong EHR documentation skills in TakeCare and Cosmic. Proven record in quality improvement, large-scale vaccination delivery and mentoring students and staff.

Experience

Registered Nurse | Nordic Family Clinic, Stockholm | 2021-Present

- Provide triage and care for approximately 25 patients per day, including wound care, vaccinations and chronic disease follow-up.
- Administered flu and COVID-19 vaccines to 2,000+ patients during the 2022 vaccination campaign.
- Document and update individualized care plans in TakeCare EHR; coordinate referrals and follow-ups.
- Developed a "patient education checklist" which improved documentation completeness by 20%.
- Mentor 2 nursing students per semester.
- Deliver BLS refreshers to staff.

Project Highlights:

- 2022 vaccination campaign — administered 2,000+ vaccines and supported clinic-wide logistics and documentation in TakeCare.
- Patient education checklist — designed and implemented checklist to standardize education documentation and improve completeness by 20%.

Community Health Nurse | Sundbyberg Vårdcentral | 2019-2021

- Managed hypertension and diabetes patient programs and improved adherence scores by 15%.
- Collaborated with physiotherapists and dietitians within multidisciplinary teams to develop integrated care plans.
- Conducted home visits for elderly patients with wound management needs.
- Logged all treatments and patient notes in Cosmic EHR.

Project Highlights:

- Chronic disease programs — coordinated hypertension and diabetes follow-up programs achieving measurable adherence improvements.

Staff Nurse | Karolinska University Hospital (Medical Ward), Stockholm | 2017-2019

- Provided bedside nursing for 10-12 patients per shift, including IV therapy and medication administration.
- Participated in infection control team and hand-hygiene audit program.

Project Highlights:

- Infection control initiatives — contributed to hand-hygiene audit program and infection-control activities on the ward.
